

Keni Nicholas Ondang

Data, AI & Product Strategy

Ho Chi Minh City, Vietnam | +84 373 485 762 | keninondang@gmail.com | [linkedin.com/in/keniondang](https://www.linkedin.com/in/keniondang) | keniondang.github.io

SUMMARY

Final-year Computer Science student specializing in Data Science, working in product operations at an AI company across four Asian markets. I turn data and research into strategy, from churn modelling and retention analytics to shipping AI-powered products and internal tools. Used to owning a market end to end and working with stakeholders in a second language. Available full-time in Dubai from January 2027.

EXPERIENCE

AI Hay, Ho Chi Minh City, Vietnam

FAI Tech's AI platform (10M+ downloads, #2 in Vietnam by MAU), launching the AI companion app Imely across four Asian markets.

Product Operations

Jul 2026 – Present

- Built 5 tools used by 25+ team members and partners across 4 markets, including a localization tool replacing manual spreadsheet translation and an AI tool turning 100+ daily customer reviews into product insights.
- Planned the user retention strategy by benchmarking 4 competitors and analyzing in-app behavior data, shipping 2 customer experience and gamification features across 4 markets.
- Managed 2 market collaborators in Taiwan and Thailand, onboarding them to the product and tools and guiding their research, localization, AI output feedback, and creator recruitment.
- Aligned 6 cross-functional teams (engineering, data, marketing, brand, design, growth) on specs and sequenced delivery; defined with the data team the retention and WAU metrics the product now runs on.

AI Chatbot Content & Experience Intern

Apr 2026 – Jun 2026

- Led the Indonesia market viability assessment across 3 competitors, covering sizing, consumer behavior, and regulatory compliance, identifying the gap that shaped Imely's positioning.
- Briefed the Product Team weekly as the primary Indonesian market intelligence resource, informing 4 launch and roadmap decisions.
- Localized 2,700+ Indonesian strings and ran a QA framework on AI (LLM, TTS) output, surfacing a launch-blocking safety gap.
- Curated local speech data, tested AI voice and text output, and gave feedback to engineering to train the models, closing the safety gap and improving response quality for Indonesian users.
- Interviewed 5 users and creators on the product experience, turning feedback into insights for the go-to-market strategy.
- Sourced and onboarded 15 Indonesian content creators, authoring guidelines that standardized quality across 100+ characters.

FPT Information System (FPT IS), Ho Chi Minh City, Vietnam

Subsidiary of FPT Corporation, Vietnam's largest tech company, with 54,000+ employees across 30+ countries.

Data Science Intern

Apr 2025 – Sep 2025

- Analyzed real-time Splunk log streams of millions of records, surfacing operational patterns and anomalies for the enterprise IT team to monitor system health and act on insights.
- Built an end-to-end Python pipeline automating ingestion and preprocessing of high-volume log data, cutting processing time by 70% with a self-structuring SQL Server layer.
- Delivered 6 live Power BI dashboards used by stakeholders to monitor ongoing business programs in real time.

EDUCATION

Ton Duc Thang University, Ho Chi Minh City, Vietnam

Oct 2022 – Oct 2026

Bachelor of Science in Computer Science

GPA: 3.7/4.00 — full academic scholarship, ranked 2nd in class, fully English-taught program

Relevant coursework: Artificial Intelligence, Data Science, Machine Learning, Data Mining, Statistics & Probability, Database Systems.

South China University of Technology, Guangzhou, China

Jul 2024

SCUT Global Engineering Summer Program

Selected for a competitive two-week AI-focused program; authored a research report on 3D Vision Intelligence.

PROJECTS & AWARDS

Customer Intelligence & Retention Analytics Dashboard (Capstone Project), TDTU

Feb 2026

Engineered 47 behavioral features on a 46M+ record e-commerce dataset, segmenting 1.8M customers into 4 behavioral groups with K-Means and predicting churn with XGBoost (80.62% ROC-AUC), using SHAP to explain churn drivers. Built a hybrid ALS recommender reaching 49.6% hit rate on 334K at-risk customers (250x random), served through a FastAPI and React dashboard with an automated human-in-the-loop email flow.

2nd Place, Data Storm 2025 Data Science Contest by Vietnam Datathon

Jan 2026

Led a team of 4 to 2nd place out of 134 teams, placing 1st in the 24-hour sprint round. Built a financial forecasting pipeline on banking transaction data, plus an analytics engine with causal inference modelling and live Power BI reporting for business stakeholders.

ORGANIZATION & ACTIVITIES

Event Coordinator, Paimuluan Ne Tonsea (PNT) Jakarta Year-End Celebration

Jan 2026

Coordinated event flow for an 800+ guest celebration spanning 55 community groups to a fixed date, with national media coverage.

Singer & Worship Leader, KJRI Ho Chi Minh City Christmas Celebration

Dec 2023 – Dec 2025

Led worship for three consecutive years at the Indonesian Consulate General's annual Christmas celebration.

SKILLS

Product & Research: Product specs and briefs in English, requirements gathering, backlog prioritization, stakeholder management, competitive and user research, user interviews, market sizing, localization QA, creator and partner onboarding, go-to-market support

AI & Data Methods: LLM and TTS output evaluation, prompt and speech data curation, EDA, segmentation, churn and retention analysis

Frameworks & Technologies: Python, SQL, React, TypeScript, TensorFlow, Flask, pandas, NumPy, scikit-learn, XGBoost, Matplotlib

Software: Git, Docker, Microsoft SQL Server, PostgreSQL, Supabase, Google Cloud Platform, Splunk, Power BI (DAX), Excel

Languages: English (C1, written and verbal), Indonesian (native), Vietnamese (conversational)
